

# **Report:**

Laurel Steel  
2018 Toxic Reduction Plan

Date: July 3, 2019

## 1. SUMMARY

Laurel Steel is providing this Toxic Reduction Accounting Report to fulfill its annual Toxic Reduction Act (TRA) and Ontario Regulation 455/09 public reporting requirements for the 2018 reporting year. Under these requirements the facility is required to undertake toxic substance accounting to better understand the quantities of toxic substances that are used, created, transformed, destroyed, released, and disposed of.

### Facility Description:

Laurel Steel manufactures low carbon free-machined cold finished bar products for the automotive and various other industries as well as fabricated wire mesh for the construction and mining industries.

## Facility Details

**Review of quantification methods and a rationale if the methodology has changed from previous reports, including a description of how the change affects tracking and quantification of the substance:**

There have been no changes in the quantification method that would result in increases or decreases in quantities estimated. There is no change recommended in TRA Plan.

**A statement of whether there has been a significant process change at the facility during the previous calendar year:**

There have been no significant process changes at the facility.

**Progress towards toxic substance reductions:**

N/A

Current TRA Plan Date(s):     December 18, 2012 (original) for lead and hydrochloric acid  
  October 31, 2016 (original) for zinc

**Substance Information and Certification:**

Provided in Sections 3 and 4.

## 3. STATEMENT OF INTENT AND OBJECTIVES:

Laurel Steel will not pursue any reduction options for the three substances, as they were found to be technically unfeasible or their impact would be irrelevant.
